

**Save and turn in with project.**

Name \_\_\_\_\_ No. \_\_\_\_\_

**Science: Ecosystem/Organism PowerPoint Presentation**

REMEMBER: BRING YOUR NOTES TO COMPUTER CLASS TO WORK ON YOUR PROJECT ON THESE DAYS: (Rm. 4-3)

---

**Slide 1: Title Slide –**

*Title of PowerPoint Presentation*

*Your Name*

*Date*

*Subject(s): Science/Computers*

**Slide 2: Organism's common name, scientific name, and picture (image)**

**Slide 3:** *Ecosystem/Habitat Name and Description:* (What are characteristics of your organism's habitat/biome? Is it a desert, jungle, wetland, etc.? What are the temperature ranges, average precipitation, terrain, or vegetation? Also, include a map where the habitat is found in the world.)

**Slide 4:** *What is the organism's place in the food chain?* (Describe what your organism eats and what eats it. Remember to use words like producer, consumer, predator, or scavenger. You can create a chain or web using text boxes with lines or Smart Art to illustrate if you would like.)

What does your organism eat?

What eats your organism?

**Slide 5:** *How does your organism adapt to its environment?* (Describe at least **one physical** and **one behavioral** adaptation of your organism and **how** these adaptations help your organism to survive.)

**Slide 6:** *Three Interesting or Fun Facts About Your Animal* – (For example, is it endangered? Another might be what is unique or unusual about it? Or do people eat it or use it for anything? Or does it migrate? Or how long does it take to have babies? Finally, you might list something you find interesting about it.)

1.)

2.)

3.)

**Slide 7:** *Sources Used for Information* – Use at least **2 sources** for your information. Note that you **don't have to list where you got your images**. If you use a book, you will list the title of the book, its author, and its date of publication. If you use a website, you need to list the website's name and its web address.
