

Dear Parents,

Coming into 3rd grade the students should have total mastery of their math facts with addition and subtraction through 18. Please have them do **Reflex twice a week** throughout the summer.

Worksheets and timed tests are a great way to reinforce the facts and can be found at:

<https://www.math-drills.com/multiop.php#addition-subtraction-facts-beyond9>.

The students should be reading books across the genres. They should read at least one chapter book over the summer, and at least once a week, read aloud to a family member. This could be a book read to a younger sibling or a page out of a chapter book to a parent.

Lastly, the public library has a wonderful reading program with incentives that might be fun to do: <https://www.mrspl.org/books-more/summer-reading>

Have a fun summer!

Sincerely,

The Third Grade Team
